¶ Of the Foure Quarters of the yeare, and first of Winter.

WInter toke its beginning vpon the 11 day of December last past at 11 of the clocke and 56 at night, the nature of this Quarter is cold and moyst, therefore it is fitly resembled to the first declining age, to flegme, to water, and to the west Winde.

The diseases of this Quarter be Pushes in the face, Lepresies, Toth-ach, red spots, and Feuers, the scab, fluxes of blood by the inferior parts, payne in the eyes, Palsies, gouts, and such like, according to the nature of the Quarter.

Of the Spring.

THe Spring taketh its beginnig vpon the 20 day of March 25. min: before one of the clocke in the morning. The nature of this Quarter is hot and moyst: and therefore resembles well to youth, to blood, to the ayre, and to the South Winde.

The ordinary diseases of this Quarter are Lepzolies, red spots, toth-ach feauers of blood, pushes or Wheales in the face,

face, small poxe, ring-wormes, falling sicknesses, and payne in the throat and necke, Kings euill, Swens, griefes in the shoulders and armes caused by blood, and whatsoeuer diseases else proceeding from a hot and moyst cause.

Of Summer.

SVmmer taketh its beginning vpon the 11. day of Iune at 4. of the clocke and 21. min: in the morning. The nature of this Quarter is hot and dry, and it is resembled to Infancie, choler, the fire and to the East Wind.

The diseases incident to this quarter are griefes and torments about the breast, ribs, and spleene, pushes, leprosie and diseases in the face as in the Spring, bleare & sore eyes, with other impediments in them: the plurisie, cough, heart and stomacke aking, sorrow, vexations, feuers of blood, apostumes, pestilence, the iaundice, paynes in the belly and secret parts, with other infirmities of a hot and dry nature.

Of Autumne.

AVtumne or Harueſt begins this yeare vpon the 12. day of September at seauen of the clock at night. The nature of it, is cold and dry, and therefore not vnfitly resembled to old age, Melancholy, the earth, and the North winde.

The diseases of this Quarter properly are paynes in the backe, darkenesse of sight, retention of vrine, fluxes of blood, paynes in the backe and priuie parts, with infirmities in the face, as in the Spring: also the canker, fistuloes, emerodes, the stone and grauell, feuers of blood, and impedements in the eyes.

Poma dat Autumnus, formosa est messibus æstas,
Ver præbet flores, igne leuatur Hyems. OVID.

Eclipses. 1628.

THere will be presented to the view of the Inhabitants of the Earth this yeare, Foure Eclipses, viz. Two of the Sun and two of the Moone: whereof one of the Moone onely shall be visibly in our Horizon.

The first Eclipse will be of the Moone vpon the 10. day of Ianuary, at 8. of the clocke and 7. min: at night, a very great Eclipse,

it

as the quantity of 18. 13. digit, and this onely will be seene of vs.

The second will be of the Sun, June 21. about 10. of the clocke and 22. min: before noone, not seene of vs by reason of the parallax.

The third will be of the Moone, July, 6. at 10. a clocke before noone, not seene of vs.

The fourth will be of the Sun, December 15. at two of clocke afternoone, not seene of vs, by reason of the parallaxe.

Of the Moueable Feasts.

MOueable Feasts are those which haue no stred place in the Kalender, and are 6. in number, to wit, Septuagesima. Quadragesima, Easter, Rogation Sunday, Ascention, and Whitsunday.

Septuagesima, is so called of 70. as it were contayning 70. dayes, which the Church doth obserue in remembrance of the 70. yeares, that the Children of Israell were vnder the Babilonian seruitude, and is alwaies three Sundayes before Quadragesima.

Quadragesima, is simply sayd of 40. as contayning 40. dayes which the Church recounts in remembrance of the 40 dayes that Moses fasted, when he receiued the Lawes of our Lord. Elias fasted so many dates, & so many dates fasted Christ before the tempter cãe.

Easter is the principall of all other feasts, and so ordyned of God at first and at this day there be three sorts, that is, Pascha Hebræorum, the Iewes Easter, Pascha verum our Easter, and Pascha novum, the Roman Easter.

The Iewes Easter was commanded to be kept the 14. day of the first moneth called Abib which day at euen was the Lords Passoner: and the 15. day should be the holy Conuocation.

Our Easter was ordayned 322. yeares after the incarnation, in a councell of learned men of diuers nations, assembled by Constantine the great, for that purpose, wherein it was ordayned that Easter should bee celebrated on the Sunday next following the first full Moone that should happen after the entrance of the Sun into Aries & a new Golden number was there deuised for the same intent. But by reason that the Aequinoctium still flyes backward from the 21. of March where then it was (insomuch that it is now about the 11. day.) there sometimes happens 2. full Moones before we can keepe our Easter: which caused the Romans to alter their Kalender so that by their Paschal tables they produce Easter alwaies the Sunday following the first full Moone according to the foresaid generall counsell held at Nice in Pontus.

Rogation is so called because nos rogat Ecclesia, the Church commands vs to continue fasting and prayers alwell against the bodily wolues such as late was in France, as also against the spirituall wolues.

Pentecost

Pentecost is so called from Pentecostos which is 50. because there be 50. dayes betwixt Easter and Whitsunday inclusiuely. And this time the Church doth obserue in memoriall of the holy Ghost that appeared to the Apostles like clouen tongues. Act. 2.

Of the Heauens, Starres, and Planets.

HEauen, in the mother of Tongues is called Schamaiim: which word (as some affirme) is compoſed of Scham signifying There or in that place, and Maiim, waters. Whereupon they conclude, that heauen is nothing else but Aquæ consolidatæ, waters firmely compacted togither. as it were Cristall.

The Talmudists alledge that it is either compounded of the verbe Schaah signifying (in Hithpael) to wonder & of Maiim, because men are drawne into exceeding admiration, in considering the workemanship of the Heauens: Or of Esch and Maiim fire and water. And thereupon Rabbi Bechai in the beginning of Paraſch writeth after this manner: The Heauens (sayth he) were created in the beginning, and are called Schamaiim because they are Esch and Maiim fire and water. And in Bereschith Rabba, it is thus red. The heauens are so called, because men wonder at them saying: Of what are they made? They are made of fire, they are made of water: this is a thing to be admired.

Yet true it is that many excellent Grumarians suppose that this Hebrew word is neither derivative, nor compound but primitive, of which opinion is that famous Hebritian Valentine Schindler. And Fagius a great author in that tongue (vpon the first chapter of Genesis) writeth that Abenesra proueth out of the Ismaelitish tongue (which hath very great affinity with Hebrew) that Scham signifieth nothing else but High or Aboue.

But howsoeuer it bee, or whatsoeuer is the true Etymologie of that word, this we are sure of, that Heauen in the Scripture is Three fold. 2. Cor. 12. 2.

1 Ayerie, where the Foules are. Gen. 2. 28.
2 Starry, where the Starres are, Gen. 1. 17.
3 Glorious, where soules are, and it is called the Heauen of Heauens. 1. King. 1. 27. and of Philosophers Empyræum.

The middlemost of which Three called the firmament, is that which containeth all those beautifull and bright shining lights, created by the Almighty Elohim, God in three persons vpon the fourth day of the Creation. Gen. 1. 14. &c.

Which

Which lights (whether moued in their seuerall spheares according to the generall opinion receiued frō reuerend Antiquity: or else moued as Fishes in the sea, or Foules in the Ayre, according to Tycho Brahe, and others the best moderne obseruators) by the common consent of all Astronomers, are of two sorts, that is to say, Fixed and Wandring, called Planets of Planaomai, signifiyng to wander. Fixed Starres are deuided into 48 Constellations, which are distinguished into 6 degrees of magnitude; Of the first magnitude are 15, Of the second 45, Of the third 208, Of the Fourth 474, Of the Fift 217, Of the sixt 49, to which are added 5 of an vncertaine magnitude, called cloudy, and 9 other yet more obscure, The Planets are in number 7 which are these, ♄ the highest, and next beneath the fixed starres; ♃ next, then ♂, ☉, ♀, ☿, and ☽ in order. Now for the diameters, magnitudes, and distances of them, as well fixed, as wandring: behold this Table.

Starres of the 1 2 3 4 5 6 magnitude.	haue their true Diameters in proportion to the earths Diameter, as	Their bodies containing the earths bodie.	Times.	Their distances in Semidiameters of the Earth.	Their meane motions.
	19 to 4	107 1/2		19000	
	269 to 60	90 1/8			
	25 to 6	70 1/3			
	19 to 5	54			
	119 to 36	36 1/8			
	21 to 8	18 1/10			
Saturne	31 to 11	22		10550
